- Inputs for third-party external mic
- External audio input
- One-button pairing
- 200' range
- 10-hour full-charge operation
- 4-hour use from a one-hour quick charge

The G2 Spoke Classroom Audio System

The G2 Spoke Classroom Audio System is a wonderful blend of technology, features, ease-of-use, and convenience. Spoke is available in stand-alone configurations for classrooms with existing display technology or embedded into G2's newest line of Interactive Flat Panel Displays named G2 *slim*.

Both the stand-alone and embedded versions of Spoke can support up to four microphones, in any combination of Spoke Teacher Microphones and Spoke Student Microphones.

The G2 Spoke Teacher Microphone

The G2 Spoke Teacher Microphone works with both the stand-alone and embedded versions of Spoke. It is small enough to fit in a shirt pocket and lightweight enough to be comfortably worn on the included lanyard.

It also includes Page-up/Page-down buttons on the side to make it easier for a teacher to roam the classroom without needing to carry along a "clicker."

The two Page-up/Page-down buttons also serves as a Panic Button – press and hold them both for 3 seconds to trigger a relay on the G2 Spoke Hub which can be connected to the school's safety system.

Battery life is 10 hours from a full charge. | A one-hour Quick-Charge provides 4 hours use.

Communications Technology

The G2 Spoke Classroom Audio System uses radio frequency (RF) operating in the 1.9GHz range. No license is required. The Spoke system automatically selects from 120 channels. This technology enables an abundance of Spoke Teacher Microphones and Spoke Student Microphones to operate in the close proximity typical of many schools.

Specifications

Technology	
Communication technology	Radio Frequency (RF) operating at 1.9GHz – no license required. Automatic channel selection from 120 available channels
RF output power	2 mW typical
Range	200 ft in an open space
